

# Monogram Wizard Plus Extended Features Pack Help

This document was created to help understand how the new Extended Features Pack for Monogram Wizard works. Detailed steps with pictures are included below with **FAQs** at the bottom.

## Steps to Combine MWP Designs and Other Purchased Designs

1. Start with "other purchased designs" [like the designs/fonts purchased at AKDesigns Boutique]. Pick a letter, frame or design that's already the correct size [EFP will not allow you to resize imported designs] or resize it to the size needed in your embroidery software.
2. Open MWP Extended Features
3. Click on the Layer 1 tab
4. Click on the drop-down arrow under Motif Pack and scroll down to the bottom and click on "x-External File-x" [like shown to right]
5. Choose the format of the file that you're importing and click OK
6. Browse to find the file that you would like to import, click on it, then click on Open
7. Your imported file is now in Layer 1
8. Click on the Layer 2 tab
9. Create your MWP monogram or import another letter, frame or design [using the steps above]. The following steps are going to go over how to add a monogram inside the frame that was imported in Layer 1.
10. In the Initials or Names section – add your initials
11. In the Monogramming Font section – choose your font
12. Your monogram or name will probably not be the size you need [like pictured bottom right], so next you will adjust the size to fit in the frame
13. In the Style Control section – adjust the letter size until it's the size that you need it to be
14. In the System Functions section – Click on Save.
15. Send the design to your machine and stitch!

## **FAQs**

**Q Can you resize purchased designs/fonts [like the designs/fonts purchased at AKDesigns Boutique] that are imported into MWP Extended Features?**

**A** No. You can't resize imported designs at all

**Q Can I use MWP Extended Features to combine letters to spell names with purchased fonts [like the fonts purchased at AKDesigns Boutique]?**

**A** Yes. There are 5 layers in MWP, so if the name is longer than 5 letters you will need to arrange the first 5 letters [1 in each layer] the way you want them to stitch, save the file, then import the file [now you have all 5 letters in layer 1 as 1 design], then add each additional letter in the other layers.

**Q Will I use the new Extended Features CD to load MWP when I use it?**

**A** No. Once you've installed the Extended Features Pack, you will use your MWP CD like you always have, but you will use the new MWP Extended Features icon to open the program.

**Q Can I flip and rotate purchased designs/fonts [like the designs/fonts purchased at AKDesigns Boutique] that are imported into MWP Extended Features?**

**A** Yes.
